Job description

Engineer will be required to design and produce technical drawings for mining equipment. Work in design teams, help with product development, client relations, travel for commissioning of plants, liaise with suppliers, and complete tasks that arise. Candidate must be reliable and innovative. Candidate will also require interpersonal skills to liaise and communicate ideas with clients.

Desired Skills and Experience

BSc degree in Mechanical, Industrial or Chemical Engineering required.
Proficient in CAD systems (preferably Autocad or Solidworks).
Valid passport as travel is required.
Proficient in excel, Matlab.

About this company

APT are world-class modular mineral processing/recovery plant manufacturers. We aim to provide high efficiency mineral processing equipment to the mining industry. We make maximum use of chemical free extraction methods and aim to provide complete modular solutions in mineral processing. Our design philosophy is focused on:

Low Energy Processing: Low energy usage in our plants reduces carbon footprint. In addition we can run our plants on generators for remote installations.

Advanced Gravity Extraction: Using just water and gravity, our plants reduce your impact on the environment.

Compact Modular Plants: allow quick assembly on site and mobility to follow your resource.

Innovative World first Tri-Cyanidation tanks: Reducing footprint and increasing efficiency through advanced mixing designs.
