

Position: **Industrial Engineer / Facility design**  
Package: around R30K  
Area: Cape Town

Our client in the retail sector has to build new warehouses and requires a candidate who will be responsible for data analysis, internal design, building specifications and project management. As well as working on other projects at the same time. You will be reporting to Supply chain development Manager.

Requirements:

- Relevant qualification (IE or BComm preferred)
- Minimum 3 years experience in facility design and project management of distribution / warehouses (Even a Architecture background will work)
- Proven design experience of warehousing, distribution centres, facility layouts a must (must be more than 2 years experience)
- Proven project management experience in warehousing and distribution, some construction project management and exposure is high desirable
- Must have strong AutoCAD experience

Will be Cape Town based, but will involve twice monthly travel to JHB for a couple of days at a time

We invite all suitably experienced applicants to send a CV to Marinda Kritzinger – not PDF to [marinda@hrlegend.com](mailto:marinda@hrlegend.com)

Only short-listed candidates will be contacted.
