3 Month Fixed Term Contract at Paarl Media Paarl for a qualified Industrial Engineer

Paarl Labels is looking to appoint a Junior Industrial Engineer for a 3 month period, who will be responsible for the analysis of statistical data and product.

Key duties and responsibilities could include:

- Analysing statistical data & product specifications to determine standards and to establish quality and reliability objectives of finished products
- Labour utilisation standards, and cost analysis systems to promote efficient staff and facility utilisation
- Recommend methods for improving utilisation of personnel, material and utilities
- Plan and establish the sequence of operations to fabricate and assemble parts or products and to promote efficient utilisation
- Apply statistical methods and perform mathematical calculations to determine manufacturing processes, staff requirements, and production standards and to coordinate quality control objectives
- Labor utilisation standards, and cost analysis systems to promote efficient staff and facility utilisation
- Confer with vendors, staff and management regarding purchases, procedures, product specifications, manufacturing capabilities and project status.

- Duties include draft and design layout of equipment, materials and workspaces to illustrate maximum efficiency using drafting tools
- Recommend cost effective and efficient solutions and strategies for continuous improvement
- Coordinate quality control objectives and activities to resolve production problems, maximise product reliability, and minimise cost
